**OR,**

**THE DOLLAR MAKER.**

can be made any size from a glove finger up to a lady's large sized hose. All hose can be made with Cap Heel, Square Heel and Hand-made Heel, and the Two Fragrant Work is limited by the ingenuity of the operator.

**THE "S" RIBBING MACHINE** is a Transfer-Needle Machine, using the same needle as the one in the cylinder. It will do everything that the plain machine can do, and in addition make beautiful rib work: One-and-One Rib, Two-and-One-Rib, Three-and-One-Rib, in fact, with the same cylinder, rib and needles it will do anything that the higher priced machine can possibly do in range of work (except speed) and runs more lightly. Ladies' and Children's Stockings can be beautifully narrowed on the "S" Ribbing Machine.

The "S" machine is warranted to knit Farme's coarse yarn "Wool, Cotton and Silk. It is a family treasure and a "S" maker.

**$100 REWARD**

To any person of responsible intelligence who cannot make one of the "S" Machines within a few hours' instruction.

Hand, by the "S" Machine. Give them time to read and write. Why should we work all day and not at night, when the "S" Machine will do all in as many hours as it takes days by hand, and make us no more happy. The "S" Machine is a Dollar friend to you.

**THE BOOK WILL TEACH YOU ALL.**

**YOU CAN TEACH YOURSELF.**

**TIME IS MONEY.**

**IT IS A NEW INVENTION. A Marvel of Mechanical Ingenuity. The Acme of Perfection and Simplicity, and positively the Cheapest and most perfect Family Knitting Machine for homes seeking Pleasure, Profit, Utility, and the one thing needful.**

It is called the "S" machine, or "The Dollar Maker." It has received this name from being a veritable "S" maker. It was invented and designed especially to meet the demands for a cheap Family Machine by Artisans, Farmers and every home that wants work in Knitting machines. It is the outgrowth of Eighteen Years' experience in the Art of Knitting and Manufacuring Knitting Machines (which now have a world-wide reputation).

**ALL PERSONS WISHING TO MAKE MONEY by Knitting, just think of the time and money spent in learning Knitting, Deco- making, fashioning, and other trades, then think how reasonable it is to spend from $2.00 to $5.00 learning Knitting, which is now not only a trade but an art, demanding the best taste and skill, and chosen for its pleasant and profitable employment by the rich as well as the workman and poor. We send expert teachers to teach purchasers of our machines at $2.00 per day and expenses.
AGENTS MAKE MONEY SELLING THE $8 MACHINE.

Only our card or advertisement (but not both) will be accepted on one $8 machine. Our $8.00 and $5.00 machines are not graded on Club Rates or to Agents.

THE REASON WHY WE CALL IT THE $8 MACHINE OR THE $8 MAKER.

Because the Maker is of the greatest interest to everybody.
Because we want a name easily remembered and never forgotten.
Because the Maker is our trade mark and best friend. It is a $8 maker.
Because THE DOLLAR is the friend of rich and poor. So is "The Maker.
Because THE DOLLAR is the way to success. So is "The $ Maker.
Then buy "The Dollar Maker." It will be a $8 friend to you.

THE

CREELMAN

TRANSFER

NEEDLE

MACHINE.

THESE MACHINES are specially designed (like OUR STAR machines) for high speed, either for hand-power or steam-power, and in such manner that Hosiery Manufacturers not using steam-power and requiring high speed can have it by ordering a 9 inch driving-wheel, which knits 3 rounds for 2 turns of crank; being ½ faster than the 6-inch driving-wheel which is usually supplied with steam-power or hand-power manufacturing machines. A new invention—patented.

The blind successfully use our machines. Send for testimonials from them.

"THE MAN TRANSFER-NEEDLE RIBBING MACHINE," like other systems has its special points of merit. In this respect it is specially adapted to the making of Ribbed Socks, Ribbed stockings and Boys' Knickerbockers, all of which can be knitted contiuously without re-setting up for each work, and in the most perfect and rapid manner by means of The Transfer-Needle, which only requires to be lifted out of the needle-cylinder and placed in the needle-dial. The stitch remaining on the needle during the operation of transferring.

In this respect it is the same as the "Dollor" machine; the needle being the "$" needle, or Creelman's Patent Transfer-Needle.
